

TRIPLE MATCH!

What makes a MATCH?

Free from MySchoolHero.com - print me and keep me next to the game!

Pick 3 cards. For EVERY feature they must be
ALL THE SAME or **ALL DIFFERENT**

The 4 features to check

COLOR

red / green / purple

SHAPE

circle / star / diamond

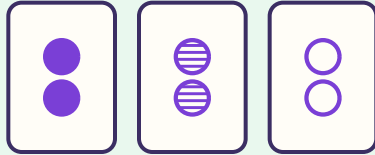

NUMBER

1 / 2 / 3

FILL

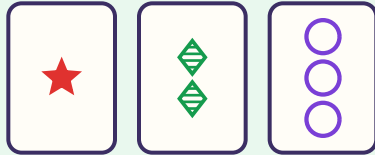

full / striped / empty

Yes or no?

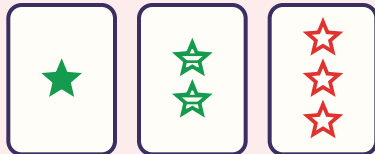

YES - this IS a match

Color: all SAME. Shape: all SAME. Number: all SAME. Fill: all DIFFERENT. Every feature passes, so it counts.

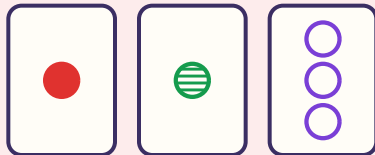

YES - this IS a match

Everything is different - color, shape, number and fill. All DIFFERENT is just as good as all SAME.

NO - not a match

Color fails: 2 greens and 1 red. That is not all the same and not all different, so it is not a match - even though the shapes work.

NO - not a match

Number fails: 1, 1 and 3. Two the same and one different never works.

Quick check - ask yourself 4 questions:

1. Are the COLORS all same or all different?
2. Are the SHAPES all same or all different?
3. Are the NUMBERS all same or all different?
4. Are the FILLS all same or all different?

All four YES = it's a match! Even one NO = keep looking.
